

# Communications Technology

■ These courses enable students to develop knowledge and skills in the areas of graphic communication, audio and video production, photography, digital imaging, broadcast journalism, and interactive new media and animation.

■ Students will work both independently and as part of a production team to design and produce media products in a project-driven environment.

■ Practical projects may include the making of signs, yearbooks, video and/or audio productions, newscasts, and documentaries.

■ Students will also develop an awareness of related environmental and societal issues, and will explore secondary and postsecondary education and training pathways and career opportunities in the various communications technology fields.
